

Website Planning Document

Daily Weather Site

Author: Alvaro Z. Student

Site Purpose

This site will provide daily updated weather forecast for Franklin, Greenville and Springfield. It will also provide information on current and future storms in these areas. It would have a gallery of photos of damages caused by the weather at each area. The home page will display current weather conditions around the US pointing out any damages. Also, it will display brief stats on the temperatures of Franklin City, Greenville City and Springfield City.

Target Audience

This website will target people 18 years of old and older.

Site Map

The site map will display the US map concentrating at the temperatures for Franking, Greenville and Springville.

Color Scheme

I will use black background, white, blue, yellow letters and weather related objects.

Typography

I am going to integrate typography with the site name “Daily Weather”. I am undecided on type of font I will be using. I may apply it as well on a quote.
